### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The prior art fails to show or fairly teach a method or apparatus for separating nitrogen from methane containing gas which a warmed recycle gas is compressed , cooled and then condensed in a condenser/reboiler in an intermediate position of the lower pressure rectification column. While Sapper et al, Yearout and Yao et al show heat exchangers in a low pressure column which use a gas from the system as a heat transfer fluid, in each case the heat transfer fluid is heated, thus teaching away from condensing the fluid as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C Doerrler whose telephone number is (703) 308-0696. The examiner can normally be reached on Monday-Friday 6:30-4:30.
